Discussion Outline

- **General questions about surveys under adverse conditions**
- **Author's comments or questions for each other**
- **Audience questions and discussion**

Surveying Under Adverse Conditions

General questions about adverse conditions:

- **What deviations from industry standard practices are required by adverse conditions?**
- **How are these deviations reported?**
- **How do these deviations impact study design, costs, and data quality? How is this discussed in the project report?**

Surveying Under Adverse Conditions

General questions about adverse conditions:

- **How can the impact of the deviations be minimized through effective planning?**
- **Can the innovative solution to the threats of adverse conditions be applied to improve the industry standard practices for non-adverse conditions?**
- **Can or should there be adverse conditions standard practices?**

Surveying Under Adverse Conditions

- **Audience Questions and Discussion**
